

BEEF CATTLE

COW/CALF, FEEDERS & REPLACEMENT HEIFERS

FEEDING DIRECTIONS: BIO-MEAL is a feed ingredient, to be added into a TMR, top dressed or included within a blend. It can be used to make specialized feeds and unique rations.

COW/CALF

BENEFITS & FEATURES:

- ❖ **Reproduction.** Reproduction and high conception rates may be improved by omega fatty acids. BIO-MEAL is an excellent source of the omega fatty acid, linolenic.
- ❖ **Lactation.** BIO-MEAL may boost colostrum quality and disease resistance in cow and calf. Better body condition score can support higher milk yield.
- ❖ **Non-Starch energy source.** Provides energy through oil, and not starch, for less digestive upsets.
- ❖ **Palatability.** Stimulates feed intake and promotes efficient rumen fermentation.
- ❖ **Environmentally friendly.** The added energy in the BIO-MEAL helps reduce the amount of ammonia escaping the rumen. Reduce methane production!
- ❖ **Cost perspective.** Better feed conversion, providing a cost savings on feed.

FEEDING RECOMMENDATIONS:

- ❖ During late summer/ early fall, or when feed quality is poor.
- ❖ Suggested to be added in the last trimester for pregnant cows and used throughout calving and rebreeding.
- ❖ Consult your nutritionist!
- ❖ Recommendations vary by, operation, feeding goals and on farm feed stocks.
- ❖ **2.0 kg/d (DM basis)**

BACKGROUNDING & FINISHING

BENEFITS & FEATURES:

- ❖ **Contains by-pass protein.** Essential amino acids are absorbed in the small intestine instead of broken down in the rumen. Provides a source of essential amino acids for production. This is especially beneficial in young stock and high milk producing cows.
- ❖ **Non-Starch energy source.** Provides energy through oil, and not starch, for less digestive upsets.
- ❖ **Improved immune function.**
- ❖ **Improved digestibility.**
- ❖ **Improved carcass weight and grade at slaughter.**
- ❖ **Cost perspective.** Better feed conversion, providing a cost savings on feed.

FEEDING RECOMMENDATIONS:

- ❖ Consult your nutritionist!
- ❖ Recommendations vary by, operation, feeding goals and on farm feed stocks.

**Suggested feeding rates are used as a guide only, and many other factors may have an overriding effect on animal response; no performance guarantee can be given. Rations should be carefully balanced with your nutritionist.*

IMPORTANT INFORMATION:

1. BIO-MEAL should be stored out of direct sunlight and in a cool and dry place.
2. BIO-MEAL should be consumed within 3 months of delivery.
3. BIO-MEAL can be purchased all year round, in bulk, or convenient mini bulk packaging. Larger bulk quantities can be delivered direct to farm.
