

SWINE

PIG STARTER, HOG GROWER/FINISHER & SOWS

FEEDING DIRECTIONS: BIO-MEAL is a feed ingredient to be added into a complete diet during all stages of production. It can be used to make specialized feeds and unique rations.

BENEFITS & FEATURES:

- ❖ **Reduced feed costs.**
- ❖ **Well balanced amino acid profile.** Fulfilling limiting amino acids such as lysine and methionine in an efficient manner.
- ❖ **High Energy.** Increased NE content is particularly important for younger pigs who lack the enzymes and gut capacity to utilize non-starch polysaccharides as an energy source.
- ❖ **Essential Fatty Acids.** Efficient use of essential fatty acids, linoleic (omega 6) and alpha linolenic acid (omega 3).
- ❖ **Good Digestibility.**
- ❖ **Rich source of Calcium and Phosphorus**
- ❖ **Palatability.** Low levels of glucosinolates to improve palatability.

FEEDING RECOMMENDATIONS:

*Maximum inclusion levels

- ❖ **Pig Starter 5% of Total Diet**
- ❖ **Hog Grower/Finisher 18% in balanced diet**
- ❖ **Sows, 15% in total diet**

**Suggested feeding rates are used as a guide only, and many other factors may have an overriding effect on animal response; no performance guarantee can be given. Rations should be carefully balanced with your nutritionist.*

IMPORTANT INFORMATION:

1. BIO-MEAL should be stored out of direct sunlight and in a cool and dry place.
2. BIO-MEAL should be consumed within 3 months of delivery.
3. BIO-MEAL can be purchased all year round, in bulk, or convenient mini bulk packaging. Larger bulk quantities can be delivered direct to farm.

Ingredients: *pure, natural, mechanical pressed canola meal.*

This feed does not contain any chemicals, bleaching clays or add backs from screened material.
